DOJ Leadership,

The entire Microsoft case has been a mistake. I buy Microsoft products because they are a great value. If they continue to offer the best value I will continue to buy them. When they stop offering the best value I will buy something else. That is the way competition must work and the Government needs to get out of the way. It is not our Government's place to provide an advantage between companies competing between each other for my business. Please stop the madness and end the Microsoft case now.

Mike Doyle
